Professional Experience & Key Projects

Gengoffee
President
France & Japan | *September 2021 to Present*

- Creation of the organisation and concept
- Lead two multicultural teams (12 in Paris, 6 in Tokyo).
- Organised cultural and social events for over 3,200 attendees annually.
- Drove expansion into the Tokyo region (2024–2025).
- Oversaw all internal and external communications with team members, partners, and vendors.
- Managed scheduling and delegation of responsibilities across teams in different time zones.
- Led strategic planning for events, including concept design, budgeting, logistics, and vendor coordination.
- Built community partnerships and increased audience engagement through targeted marketing.
- Conducted post-event evaluations to assess impact and identify areas for improvement.

Freelance
DevOps / Developer
Paris, France | *August 2022 to Present*

- Conceptualised and developed web and iOS mobile applications to support cultural events in Paris and Tokyo.
- Increased event registration by 20% through custom digital solutions.
- Updated APIs (NodeJS) for new user and event management features.
- Developed mobile apps using Swift/SwiftUI for improved check-in and attendee tracking.
- Mentored interns in mobile, web and backend development.
- Led deployment and maintenance using Azure and GitHub CI/CD.
- Conducted testing and debugging to ensure a seamless user experience and reduce operational downtime.
- Oversaw SEO strategies and served as Data Protection Officer.
- Developed a full web platform with SQL, NodeJS, and Azure deployment, automating registration, communication, and organiser workflows.

DreamIT
Consultant DevOps, Developper
Paris, France | *November 2025 - Now*

Lazard Bank:

- Modernization and industrialization of the DevOps environment: Development of infrastructure scripts, modernization of CI/CD pipelines in YAML, templating, development of new pipelines.
- Update of the Azure DevOps Server environment: Azure DevOps Server 2022 → ADO Server, update of build tools and extensions.
- Security and access management: Audit of service account accesses, separation of responsibilities between service accounts and servers, implementation of a password rotation system through CyberArk.
- Git repositories administration: Implementation of policies, management of user permissions on repositories (Azure DevOps, GitLab).
- Implementation and support around DevOps and AI tools.
- Contribution to the AI integration into development and DevOps processes: Auto review, analysis to prevent secrets from being pushed into repositories, etc.
- Creation and configuration of Windows Server machines dedicated to build requirements (Dev/Preprod/Prod).
- DevOps support and maintenance: Pipeline updates, infrastructure scripts updates, etc.
- Writing of technical documentation and infrastructure assessments.

- **Environment and technologies :** Azure DevOps Server, PowerShell, YAML, CyberArk, Windows Server, CI/CD, GitLab.

GAZELENERGIE

DevOps / Developer Infra

Courbevoie, France | *November 2021 to October 2023*

- Automated over 25 recurring tasks across 7 departments using Bash and PowerShell scripts.
- Boosted productivity by 15–30% through infrastructure scripting.
- Deployed infrastructure and application solutions using Docker and Azure Container Services.
- Implemented Azure Automation Runbooks, warning systems, and file archiving processes.
- Managing cross-functional teams (internal and external) to deliver projects on time and within scope.
- Supported development and data teams by deploying cost-effective solutions, improving efficiency up to 20 times.
- Assistance of multiples cyber security audits by reviewing code and analysing linux environments
- Led a cost-effective solution audit by analysing logs from Azure Metrics

GAME OFF & Oishi Market

Fullstack Developer

Paris, France | *October 2020 to October 2021*

- Designed, developed, and maintained custom e-commerce platforms to support retail operations and enhance the customer experience.
- Created and integrated scripts to streamline warehouse and logistics processes, increasing shipment preparation speed and efficiency by over 20%.
- Collaborated with stakeholders to understand business requirements and translate them into scalable technical solutions.
- Maintained both front-end and back-end functionality, ensuring site performance, responsiveness, and data accuracy.
- Provided ongoing support and implemented feature enhancements based on user and business feedback.
- Assisted the implementation and oversaw the updates of the SEO strategy

DDM Prod

Web Developer

Paris, France | *September 2019 to October 2020*

- Developed and maintained e-commerce solutions tailored to clients’ business models and sales workflows.
- Wrote infrastructure scripts to support web services, automating deployment and system maintenance tasks.
- Participated in the full software development life cycle: requirements gathering, design, development, testing, and deployment.
- Optimised web performance and ensured compliance with modern security standards.
